CA

A serene calmness falls over you when you enter the upstairs sitting room. It simply draws you into a silvery blue haven. Combining Asian elements with Deco and classically French furnishings, the designer achieves the definition of an inviting room. Introducing a punch of rose to the platinum blue hues creates a contrast that is quite pleasing to the eye. The feeling of softness, sensitivity and style that is the foundation of this space culminates in the soft and silky “la vie japonaise” on the window. This is a place to return to again and again. Just sit here, relax and gather your dreamiest thoughts.
